

GENERAL INFORMATION

All materials and tools will be explained during the first class meetings at the start of Autumn Semester. To avoid uncertainty, you may wait after the first class to purchase some of these supplies. It is, therefore, unnecessary to bring supplies to class on the first day.

HOWEVER, items marked with "+" MUST be brought on the first day.

The complete list is here to give you a sense of the scope of materials required for first semester. Assume that all other items, unless marked with "‡" are needed for the second day of class.

If you already own some of these materials please use what you have, you do not need to purchase duplicates.

COMPUTER REQUIREMENTS

All undergraduate students entering the School of Design are required to have a personal laptop computer in the classroom.

Since equipment is constantly evolving, students should not purchase their computers until they have attended orientation. Throughout the year, the most current computer information is available at:

daap.uc.edu/admissions/computer_requirements

Many of our programs have additional technology requirements for students in later years of study.

IT IS STRONGLY RECOMMENDED that each student have a personal color printer.

Also: 4 (or more) extra color ink-jet cartridges, Matte photo paper double-sided (heavy weight) 8.5" x 11" available at Staples

LOCATIONS to purchase Foundation Design Kit and other art and design materials.
