

GENERAL INFORMATION

Please note that these requirements may be slightly altered as the equipment evolves. The requirements listed on the Web site will always be the most recent and accurate. Therefore, students new to DAAP are encouraged to delay their computer purchase until the summer prior to entering to make the most informed computer purchase.

All material and tools will be assigned and explained during the first class meeting. If you are not sure about a material, wait until first day of class to get your materials. It is not necessary to bring materials to the first class meeting

If you already own one or more of the required materials it is not necessary to get a new one. Please use the one you already have.

COMPUTER REQUIREMENTS

All undergraduate students entering the School of Design are required to have a personal laptop computer in the classroom.

Each discipline has it's own specific requirements for hardware and software. You can review the current requirements at <http://daap.uc.edu/compreq/>

Many of our programs have additional technology requirements for students in later years of study

Foundation Studio COLOR 23-FDST-101
