

General Information

Materials and tools will be explained during the first class meetings at the start of the semester. You should purchase your Foundations Kit prior to the start of classes. Other materials can be bought as needed. Your instructor will notify you in advance of the beginning of the semester to clarify what materials you need to bring the first day.

Technology Requirements

All undergraduate students entering the School of Design are required to have a personal laptop computer in the classroom. Since equipment is constantly evolving, students should not purchase their computers until they have attended orientation. The most current computer information is available at:

http://daap.uc.edu/academics/computer_requirements.html

Some of the programs in the School of Design have additional technology requirements for students in later years of study.

It is strongly recommended that each student have a personal color printer as print queues develop around project due dates and you will not be able to print your work last minute.

Places to Purchase Supplies

The Foundation Design Kit can be purchased at:

DAAP Store
Aronoff Center 4432

Plaza Artist Materials
230 W. McMillan St., Cincinnati, OH, 45219
